DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuwabara et al. (JP 409283441A) in further view of the admitted prior art.

Kuwabara disclose the limitations of:

a first step of melting completely the amorphous silicon layer using a laser beam thereby forming the polycrystalline silicon layer (fig. 2); and

a second step of melting an upper portion of the polycrystalline silicon layer using the laser beam (fig.3) (disclosure in the attached abstracted).

Kuwabara discloses the claimed invention except the limitations pertaining to the mask, conditions of melting a region, and the light transmittance of the mask pattern.

However the admitted prior art (figures 2-5, pages 3 - 5) disclose these general limitations of a laser annealing technique, therefore the laser annealing technique of Kuwabara also, read on these basic techniques/limitations.
